

The Yellow Thimble is for the Quick Release/Pelican.

The Black Base MUST be hooked up to the Cradle.

The Painter Line coming out of the life raft MUST be hooked up to the Red Weak Link.

### CAUTION:

If the Painter Line is wrapped to the Cradle or attached to a solid point, there is no weak link mechanism in operation. **THIS IS DANGEROUS.**

**IF ATTACHED IMPROPERLY, THE RAFT WILL NOT DEPLOY PROPERLY, AND IT MAY GO DOWN WITH THE VESSEL.**
